

HPS PO ADVANTAGE

12/22

How many people order supplies at your facility? If more than one, it can be challenging to get a true accounting, both financially and inventory-wise. And then you run the risk of going over budget, or, worse, having expired medications and other materials on hand.

Our PO Advantage Value-Added Tool is your solution: Manage all your POs, invoices and supplier payments—as well as make purchases—on one breakthrough platform.

VERY EASY TO GET STARTED

Before you start thinking this will be something complicated to set up and use, with a long learning curve, hold on.

HPS, or rather MedProcure, the company that developed the tool:

- handles the setup for you, using your purchasing information
- teaches you and your staff how to use the tool
- is available whenever you want to make changes
- is just a call away to answer your questions.

In other words, we handle the back end, and you get credit for taking control of your organization's purchasing and supplies management.

SPECIFICALLY

- Incorporate *all* your vendors, including HPS vendors like GFS, McKesson, Staples, Lowe's, and every other company you shop with, including online retailers like Amazon.
- Multiple vendors, one purchase order.
- Grant specific permissions based on thresholds and category.
- View all your POs at once, so you maintain oversight and monitor PO status in real time.

COST

HPS Members always pay the smallest fees available: \$95 monthly service fee per location; \$1,500 setup fee per location.

WHAT'S THE ADVANTAGE?

• Pricing Audits

Know you are paying the right price, every time. PO Advantage automatically manages, tracks and audits pricing under the HPS contracts you use (including GFS and McKesson), as well as from any other place you purchase from, from Amazon to other direct contracts and special pricing agreements you have.

• Helps Eliminate Human Error

PO Advantage integrates effortlessly with most accounting systems to eliminate double entry and errors. It also provides punch out solutions to vendors when you prefer to shop their catalogs yet maintain formulary and purchase order controls.

• Inventory Tracking

Track on-hand inventory levels for any or all items you maintain. Eliminate waste by tracking expiration dates and serial/lot numbers on pharmaceuticals and other expensive and critical products.

• Resident Charges

PO Advantage even allows long-term care facilities to track supply usage for their residents, eliminating the need for multiple systems. Staff simply and quickly notes usage on a PC, tablet or smart phone.

GETTING STARTED

Visit poadvantage.com and ask for a demo of the site. For assistance, contact David Quattlebaum at dquattle@medprocure.com.
